

silent circle

Your Business Requires Privacy. Silent Circle Delivers.

Silent Circle is a secure communications company offering mobile devices, software applications, and communication management services to enterprise.

DEVICES

BLACKPHONE

Blackphone is the world's first smartphone built from the ground up to be **private by design**. Now bigger, faster, safer.

POWERED BY SILENT OS

Silent OS is our Android-based operating system, enhanced to address mobile privacy concerns facing enterprises today. Free of bloatware, hooks to carriers, and leaky data, Silent OS puts privacy in your hands without the usual compromises. **Spaces** enable work and personal lives to coexist on a single phone.

SOFTWARE

SILENT PHONE

Secure calls, texts, and file transfer are now possible with any iOS or Android device. With **Silent Phone Plus**, encrypted voice to video chat, conference calling, and voice memo capability ensure your business keeps moving with the utmost efficiency.

SILENT WORLD

Extend the reach of private communication, even when you're calling someone who doesn't have Silent Phone. Silent World calls have enhanced security over conventional calls since the leg of the call from your device is encrypted, keeping you safe from local eavesdropping threats.

SERVICES

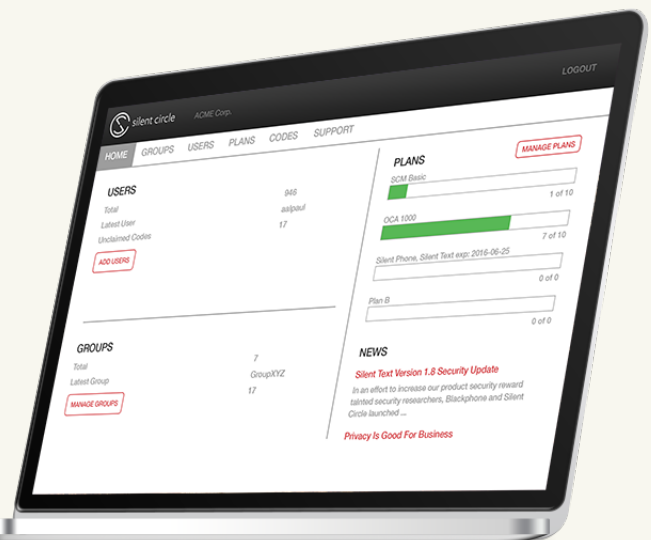

SILENT MANAGER

Silent Circle offers a user-friendly and secure web-based service to manage the users, groups, plans and devices in place across your enterprise with **simple, zero-touch deployment**.

INTEGRATE YOUR MDM

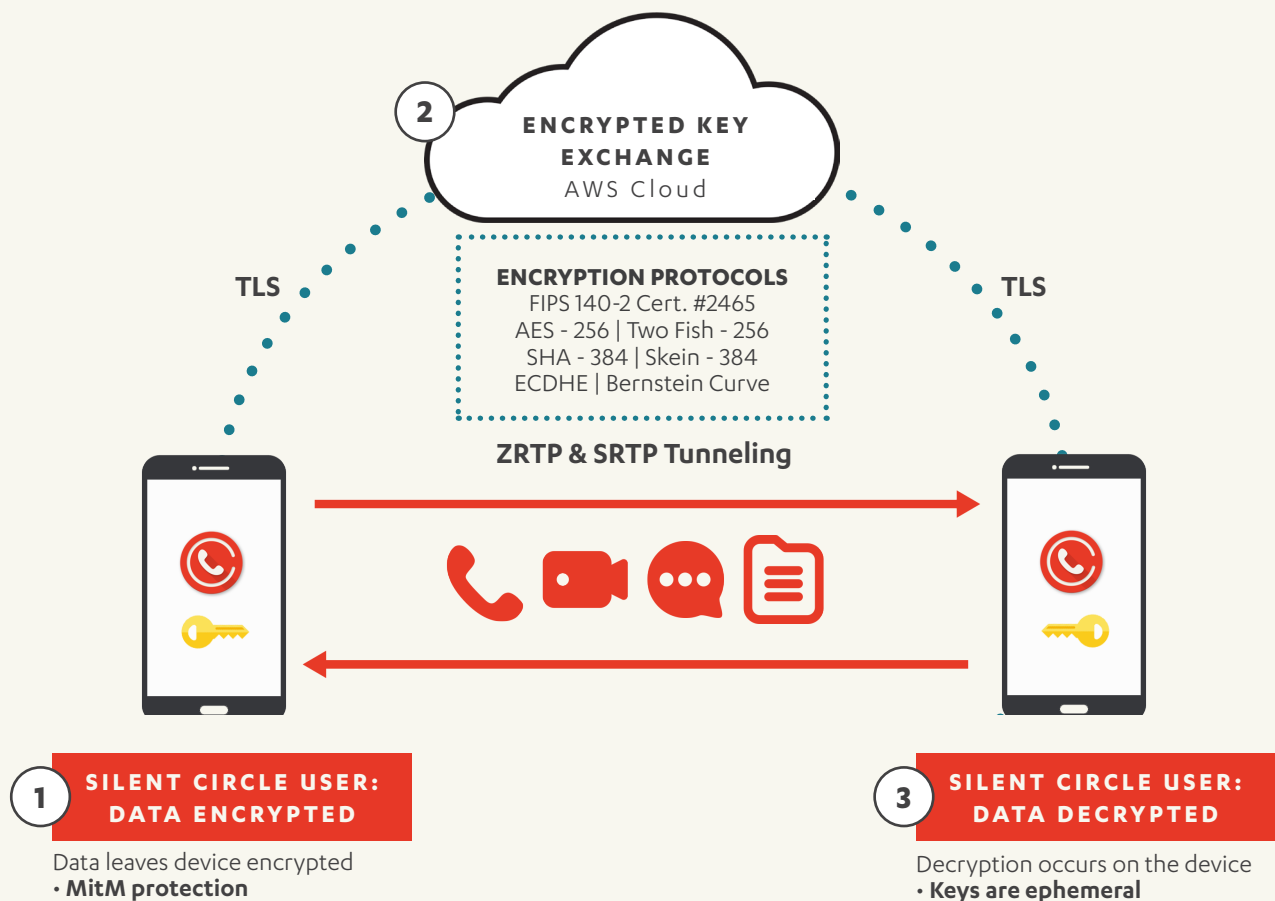

Get your enterprise up and running easily: Blackphone integrates with popular MDM systems and the Android for Work Program.

CITRIX  

How It Works

When a Silent Circle subscriber makes a phone call or video chats with another Silent Circle member, that transmission is secured and encrypted end-to-end.

Want To Look Under the Hood?

Silent Circle believes strongly in transparency. We also value and encourage community input and review of our systems and services, so Silent Circle frequently releases source code and hosts bug bounty programs for reporting qualifying security vulnerabilities.

Who We Are

We were founded by some of the best minds in mobile technology, encryption, security, and privacy. Silent Circle exists to keep conversations between employees, customers, and partners private. The Silent Circle Enterprise Privacy Platform offers devices, software, and services all working together to keep you and your business safe and secure.

BILL CONNER
President & CEO

Bill Conner's career spans over 30 years across numerous high-tech industries, and served as the President & CEO of Entrust for over 12 years. He has received the Tech Titan Corporate CEO of the Year award, US November Top 100 award, CMO of the Year, and Telly Award.

MIKE JANKE
Co-Founder & Chairman

Mike Janke is a noted privacy advocate and a former member of the elite SEAL teams. Mike speaks around the world on policy and defending individual rights to privacy. He is the founder of SOC, one of the country's largest defense logistics and security firms.

PHIL ZIMMERMANN
Co-Founder & Chief Scientist

Phil Zimmermann is the creator of both PGP and ZRTP. Phil has been inducted into the Internet Hall of Fame and named one of the 'Top 50 Tech Visionaries' of the last 50 years as well as one of the 'Top 10 Innovators in E-business.'

JON CALLAS
Co-Founder & CTO

Jon Callas is a cryptographer, software engineer, and entrepreneur. He is the co-author of many crypto and security systems and has worked for Apple, Tesla, Kroll-O'Gara, Counterpane, and Entrust.
